

REMARKS

Applicants respectfully request reconsideration of the subject matter identified in caption, pursuant to and consistent with 37 C.F.R. §1.116, and in light of the remarks which follow.

Claims 9 and 10 are pending in the application.

Turning now to the Official Action, Claims 9 and 10 stand rejected under 35 U.S.C. §112, first paragraph, as containing subject matter not adequately described in the specification. For at least the reasons that follow, withdrawal of the rejection is in order.

The Official Action asserts that there are two outstanding issues with respect to Applicants deposit. In particular, the Official Action asserts that Applicants have not: (1) shown that the Imtec depository is a “fully recognized depository;” and (2) provided an appropriate statement concerning availability of the deposit.

With respect to the first issue, Applicants have provided the attached depository listing taken from PCT Applicant's Guide – Volume 1- Annex L, which was updated on May 6, 2004. Page 19 of the Annex lists the Imtec depository as an institution “having acquired the status of international depository authority under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure.” Applicants submit that this listing proves that the Imtec depository is “fully recognized.”

With respect to the second issue, Applicants hereby submit that their deposit of “*Bacillus sp.* IICT 01” (specimen no. SI (5-9-88) Herb. IMI No. B12681) is publicly available and that all restrictions on the availability of the public deposited material will be irrevocably removed on the grant of the patent on this application.

In view of the attached listing, showing that the Imtec depository is "fully recognized," and Applicants' above statement concerning the availability of the deposit, Applicants respectfully request reconsideration and withdrawal of the §112, first paragraph, rejection of claims 9 and 10.

From the foregoing, Applicants earnestly solicit further and favorable action in the form of a Notice of Allowance.

If there are any questions concerning this paper or the application in general, Applicants invite the Examiner to telephone the undersigned at the Examiner's earliest convenience.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.

Deposits of Microorganisms and Other Biological Material

List of depositary institutions

Note: This table does not indicate in relation to depositary institutions the kinds of microorganisms or other biological material which may be deposited with and the fees charged by them. This information may be obtained directly from the institutions. As regards depositary institutions which have acquired the status of international depositary authority under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure, such information is published at the time of the acquisition of the status of international depositary authority in the WIPO monthly review *Industrial Property and Copyright*. Furthermore, the January issue of the said review indicates, for each international depositary authority, the kinds of microorganisms and other biological material that it accepts and the fees charged by it. For more detailed information, see the *Guide to the Deposit of Microorganisms under the Budapest Treaty*.
